## Introduction Black Box / DKM

Tom Fitzgerald

**BLACK BOX®**

## Main Markets

- DKM first choice in Matrix systems where IP is not the preferred option

### Defense/Public Safety

- Secure access to data/Training Simulators/Monitor & Response
- Control room operations
- Collaborative working
- Resilience/Redundancy
- Reduce Space & Environmental issues at user
- EAL4+/NLP

Key Applications: Analyst Desks, Control Centres

### Industrial

- Monitor & Response/Process Control
- Optimize work-flow operations
- Resilience/Redundancy
- Reduce Space & Environmental issues at user
- Legacy Connectivity
- Certifications

Key Applications: Remote control of machines, Securing data/assets

### Transportation

- Air traffic control/Rail/Shipping
- Optimize work-flow operations
- Resilience/Redundancy
- Reduce Space & Environmental issues at user
- Legacy Connectivity

## Modular Switches – Enterprise Switches

48 port capacity  
3U height

80 port capacity  
4U height

160 port capacity  
9U height

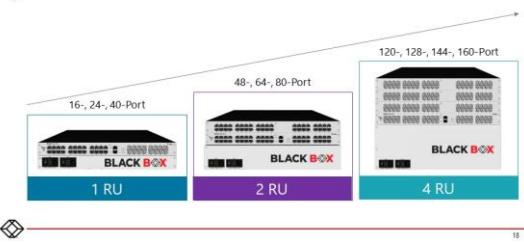

288 port capacity  
13U height

576 port capacity  
13U height

## DKM – Compact II

## Extender I/O Modules

### Video

- DVI-D, Display Port/4K, SDI, HDMI, VGA
- Single/Dual/Multi-Head
- Single/Dual-Link

### Audio

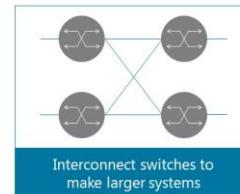

- Analog (Bi-Di), Digital (uni- or bidirectional)

### Peripherals / Data

- USB 2.0, USB-HID, RS-232, IR

## Switch Interconnection

**Icertis Contract Intelligence**  
A smarter approach to business

Icertis

A woman in an orange shirt points at a computer screen while a man in a green shirt looks on.

CLM solutions can transform contracts into valuable corporate assets...

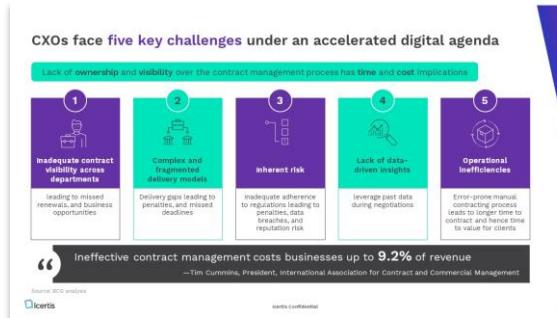

Efficient contract lifecycle management can unlock significant value across levers

Revenue assurance & pricing	Delivery excellence	Compliance & low-risk	Efficient operations
2-3% revenue uplift	20-30% reduction in performance related penalties	Up to 80% contracts have become compliant	30-40% reduction in contract creation time ~50% reduction in 3rd party contract renewing time
• Tracking contract renewals • Better price negotiation	• Better price negotiation	• 1-2% cost optimization	• ~50% reduction in 3rd party contract renewing time

**30-40%** reduction in FTE time spent by operations, & legal teams, due to process automation

Source: BCG analysis  
Icertis

Icertis Confidential

CXOs face five key challenges under an accelerated digital agenda

Lack of ownership and visibility over the contract management process has time and cost implications

1. Inadequate contract visibility across departments
2. Complex and fragmented delivery models
3. Inherent risk
4. Lack of data-driven insights
5. Operational inefficiencies

“Ineffective contract management costs businesses up to 9.2% of revenue

—Tim Cummins, President, International Association for Contract and Commercial Management

## Zeniply Investor Deck

Empowering Businesses Through Efficient Training Management

Gurta Singh Bawa, Founder & CEO  
[gurtasingh@zeniply.com](mailto:gurtasingh@zeniply.com)

The slide features a central illustration of three people interacting with a computer screen displaying training data. A target icon is positioned at the top right.

### The Training Management Industry Challenges - 1

The slide lists three challenges with corresponding icons and descriptions:

- Lack of Multi-Modal Training Support**: Training systems often rely on single mode formats (e.g., only online or only classroom-based). Impact: Diverse learning preferences are not met, leading to low engagement and retention.
- Inadequate Tools for Team Based Training Management**: Limited features for managing different groups within an organization. Impact: Inefficiencies in assigning, tracking, and reporting on training across various groups.
- Difficulty in Tracking and Managing Training Progress**: Traditional systems provide limited tracking capabilities, often only showing course completion. Impact: Managers' lack visibility into individual and team progress, making it challenging to provide necessary support.

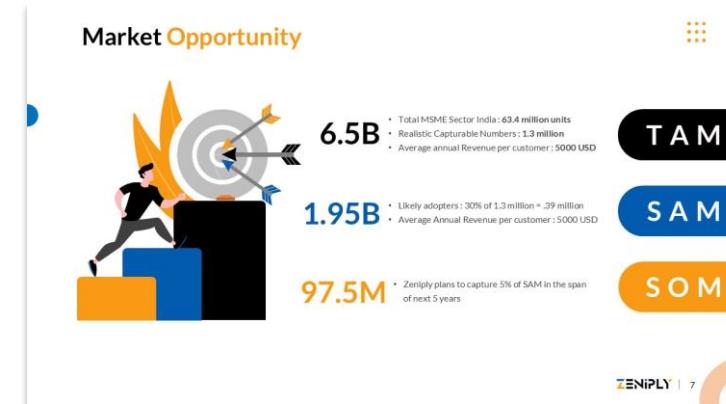

ZENiPLY | 4

### Our Mission

At Zeniply, our mission is to revolutionize organizational training with a cutting-edge platform that integrates diverse training methods, comprehensive tracking, and granular team-based management. We empower businesses to maximize workforce potential, drive measurable growth, and ensure seamless training for employees, vendors, partners, and clients. Through innovation and efficiency, we are transforming the way businesses educate and develop their teams, positioning them for success in a dynamic marketplace.

The slide features an illustration of three people pushing a large blue sphere along a path, symbolizing movement and progress.

### Market Opportunity

The slide illustrates the Market Opportunity Model (TAM, SAM, SOM) with the following values:

- TAM**: 6.5B • Total MSME Sector India : 63.4 million units  
• Realistic Capturable Numbers : 1.3 million  
• Average annual Revenue per customer : 5000 USD
- SAM**: 1.95B • Likely adopters : 30% of 1.3 million = .39 million  
• Average Annual Revenue per customer : 5000 USD
- SOM**: 97.5M • Zeniply plans to capture 5% of SAM in the span of next 5 years

**Product**

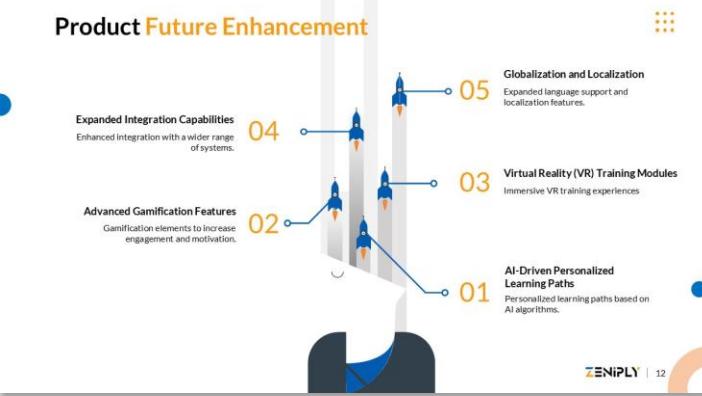

Zenify is a cutting-edge training management platform designed to revolutionize organizational training by offering diverse training methods, comprehensive tracking of user progress, and granular team-based management.

**Core Features**

- Multi-Modal Training Support:**
  - Classroom Training
  - Recorded Videos
  - Live Online Sessions
  - Course Catalog
- Automated Notifications and Task Management:**
  - Automated Reminders
  - Task Assignments
- Granular Team-Based Management:**
  - Team-Specific Training Plans
  - Role-Based Access Control
  - Team Dashboards
- Seamless Onboarding Experience:**
  - Structured Onboarding Programs
  - Progress Tracking
- Comprehensive Tracking and Analytics:**
  - Real-Time Progress Tracking
  - Customizable Training Paths
  - Detailed Analytics and Reporting
- Mobile App:**
  - Training on the Go
- Certification Management:**
  - Track Certifications
  - Renewal Reminders
- Training Matrix and Skill Matrix:**
  - Training Matrix
  - Skill Matrix
- Extended Training Capabilities:**
  - Vendor and Partner Training
  - Customizable Access Levels
- SCORM Compliant:**
  - Course Management

ZENIFY | 6

## Product Future Enhancement

**Security**

We take security very seriously and have implemented multiple measures to ensure the safety and integrity of our platform:

- Data Encryption**  
All data, both in transit and at rest, is encrypted using industry-standard protocols.
- Authentication and Authorization**  
We use Spring Security with OAuth 2.0 for secure authentication and role-based access control to manage permissions.
- Presigned URLs**  
We use AWS presigned URLs to store/retrieve data from cloud for secure and fast data transfer.
- Regular Audits**  
We conduct regular security audits and vulnerability assessments to identify and address potential risks.
- Compliance**  
Zenify complies with relevant data protection regulations, including GDPR.

**Product**

**Unique Selling Points**

- Advanced Analytics and Reporting:**  
Advanced analytics and insights supported by customizable reports, pivots, visualizations and more.
- Granular Customization:**  
Highly customizable training plans at granular team levels and role-based access controls.
- Mobile Accessibility:**  
Comprehensive mobile app for training on the go.
- Comprehensive Tracking:**  
Real-time progress tracking and detailed analytics.

PROPOSAL

# PPT Slides

## Business Model

**Sales & Distribution Channels Scalability and Growth Potential**

- Direct Sales: Outbound sales team setting up product demos and direct sales.
- Digital Marketing: SEO, SEM, content marketing, and social media campaigns.
- Partnerships: Collaborations with HR consultancies, industry associations, and technology partners.

**Scalability and Growth Potential**

- B2B Market in India: Deepen penetration in the SME and large enterprise segments.
- B2C Market in India: Expand into the tuition management platform for K-12 and higher education.
- International Expansion: Enter new geographic markets starting with neighboring countries.

**Market Penetration:**

- Strategy: Aggressive marketing, strategic partnerships, and product enhancements tailored to new markets.

13

## Business Plans

Plan	Price (Month)	Price (Year)	User Count	Cloud Space
Basic Plan	10,000	108,000	Up to 50 users	2 GB cloud space
Premium Plan	50,000	540,000	Up to 250 users	15 GB cloud space
Standard Plan	20,000	216,000	Up to 500 users	3 GB cloud space
Enterprise Plan			Customer users	Customer cloud space

16

## Go-To-Market Strategy

**Early Sales Success**

**Highlight:**

- Sales Launch: Sales efforts started just two weeks ago.
- Demo Setup: Successfully setting up 5 demo environments, generating strong market interest.
- Impact: Early success demonstrates market demand and validates our sales approach.

**B2B Market in India:**

**Resources Needed:**

- Sales Team Expansion: Hiring and training sales personnel.
- Marketing Budget: Funds for digital marketing and promotional activities.
- Partnership Development: Resources for strategic partnerships.

**Strategy:**

- Outbound Sales: Active outreach, setting up 5-7 demos daily.
- Digital Marketing: SEO, SEM, content marketing, and social media campaigns.
- Inbound: Collaborations with HR consultancies, industry associations, and technology partners.

**Target Market:**

- SMEs: Small and medium-sized enterprises.
- Large Enterprises: Corporations with extensive training needs.

ZENIPLY | 17

## Go-To-Market Strategy

**Customer Acquisition**

**Market Penetration Strategies:**

- Aggressive Marketing: Increase spend to drive awareness.
- Strategic Partnerships: Enhance credibility and reach.
- Product Enhancements: Improve based on feedback and market needs.

**Expansion Plans**

- Deepen Penetration in B2B Market: Expand within SME and large enterprise segments.
- Explore B2C Market: Develop ZeniPly as a tuition management platform.
- International Expansion: Enter new geographic markets.

**Scalability and Growth**

**Tactics:**

- Lead Generation: Inbound and outbound marketing.
- Conversion Optimization: Strategies to improve conversion rates.

**Sales and Marketing Channels**

**Marketing Tactics:**

- Content Marketing: Blogs, whitepapers, case studies.
- Webinars and Workshops: Online events to demonstrate ZeniPly's value.
- Email Campaigns: Targeted emails to nurture leads.

**Channels:**

- Direct Sales: Personal interactions and demos.
- Digital Marketing: Online platforms for lead generation.
- Referral Programs: Incentives for existing customers to refer new clients.

## Competition

The training management platform market is competitive, with several established players. Understanding this landscape helps us position Zenipy effectively and highlight our unique advantages.

### Competitive Landscape

Feature	Zenipy	Cornerstone OnDemand	SAP Ultimo	Talent LMS
Multi-Modal Training Support	✓	✓	✓	✓
Granular Team-Based Management	✓	✓	✓	✗
Real-Time Progress Tracking	✓	✓	✓	✓
Mobile Learning	✓	✓	✓	✓
Certification/Expiry Notification	✓	✓	✓	✗
Advanced Analytics	✓	✓	✗	✗
Affordable Pricing	✓	✗	✗	✓
Digital induction forms, onboarding processes	✓	✗	✗	✗
Digital training matrix	✓	✗	✗	✗

**Yearly Breakdown:**

Year	Net Loss	Revenue	Expenses
1	23,040,000	12,960,000	36,000,000
2	20,160,000	51,840,000	72,000,000
3	25,920,000	155,520,000	129,600,000
4	388,800,000	622,080,000	233,280,000
5	824,256,000	1,244,160,000	419,904,000

**Profit and Loss Statement:**

**Revenue Projections**

Our financial projections demonstrate Zenipy's growth potential and financial health over the next few years. These projections are based on realistic assumptions and our strategic growth plans.

### Revenue Projections (INR)

**Assumptions:**

- Demos: 5 customer demos per day.
- Conversion Rate: Starting with 5 customers per month, doubling every year.
- Average Company Size: 200 employees.
- Subscription Pricing: Based on the annual subscription plan (Rs 216,000/customer/year).

### Revenue Forecast

Year	Revenue (INR)
Year 1	12,960,000
Year 2	51,840,000
Year 3	155,520,000
Year 4	622,080,000
Year 5	1,244,160,000

### Yearly Revenue Breakdown

**Expense Projections (INR)**

**Our Current Monthly Expenses:**

**Assumptions:**

- Annual Increase: Estimate around 100% for the first year due to initial scaling, then 80% annually as the company grows.

**Expense Projections:**

Year	Expense (INR)
Year 1	36,000,000
Year 2	129,600,000
Year 3	419,904,000
Year 4	1,332,800,000
Year 5	4,396,800,000

### Detailed Expense Breakdown

**Areas of Expenditure:**

- Salary Increases for the Current Tech Team: Adjusting salaries to market standards.
- Expansion of Tech Team: Hiring additional developers, engineers, and support staff.
- Marketing and Sales Expenses: Increasing marketing efforts and expanding the sales team.
- Leadership Roles: Bringing in experienced leadership to guide various departments.
- Cloud and Infrastructure Costs: Increasing cloud storage and infrastructure costs as client numbers grow.
- Operational Costs: Office space, utilities, and other operational expenses.

### Yearly Expense Breakdown

**Page Number:** 22

## Profit and Loss Statement

**Yearly Breakdown:**

Year	Net Profit	Revenue	Expenses
1	23,040,000	12,960,000	36,000,000

**privacera**

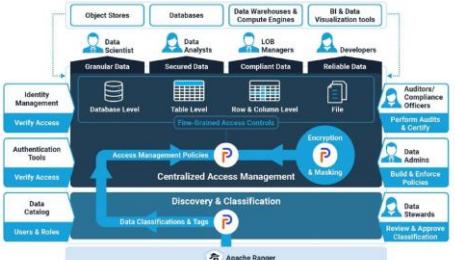

**Fortifying Data Access and Security Controls for the Public Sector**

Whitepaper  
August 2022

Fortifying Data Access and Security Controls for the Public Sector

### Resolving the Conflict

Privacera's centralized access governance and data privacy framework uses the approach of securing data assets at the data level to resolve the government's conflicting data interests in several ways. The first is by a flexible architecture designed for cloud services that resonate with this space because many federal entities are coming from Cloudera, are familiar with [Apache Ranger](#), and have existing Ranger policies. The lightweight nature of this architecture is perfect to layer into federal compute platforms because it's mostly plugin based. These plugins swiftly authenticate users to support the performance of thousands of users simultaneously accessing and querying data while these unified platforms continue to run natively.

Privacera scales to manage hundreds of thousands of users and more than 25 petabytes of data; it's also highly extensible and built on open standards. Moreover, it fortifies authentication, access controls, and data governance to enhance security within individual sources, operating at the data (instead of the perimeter) level. This is key for satisfying the dual mandate of data democratization with a light architectural footprint in sources that supports performance needs while delivering the security for dependable access controls and regulatory compliance.

Fortifying Data Access and Security Controls for the Public Sector

 DATA SHEET

## SambaNova DataScale® SN30

The Platform for Innovation

**Features:**

- SambaNova Reconfigurable Dataflow Architecture™ (RDA)
- State-of-the-art SambaNova Reconfigurable Dataflow Unit™ (RDU)
- Terabytes of memory
- SambaNova SambaFlow™
- Subscription pricing

**Benefits:**

- Unprecedented performance for the most demanding applications
- Ability to run the largest models and process the largest data
- Ease of use. Users interact with common frameworks and languages to use proprietary programming languages.
- Automatically extracts, optimizes, and executes the optimal data flow graph of your application's parallelizable Reconfigurable Dataflow Units
- Seamless scalability across systems with up to 100Gb/s back-to-back bandwidth and latency
- Complete hardware and software system for training and inference

**SambaNova DataScale®** is a fully integrated hardware-software system that enables organizations to train and deploy the most complex deep learning models, including GPT, large language models, and AI for Science workloads and achieve world record performance with the largest and most challenging models such as GPT-3.

**DataScale's Dataflow computing architecture combined with large on-chip and system memory enable organizations to manage state-of-the-art models which cannot be practically handled by GPUs, such as:**

- Very large models, such as 10G+ parameter large language models
- Very large data, such as ultra-high resolution 2D and 3D image data
- Very detailed models, such as RNNs, sparse models, and AI for Science workloads

Powered by the state-of-the-art SambaNova Reconfigurable Dataflow Unit, DataScale delivers world record time to train performance and world record GPT accuracy, combined with unprecedented ease of use, to power the most advanced deep learning, Foundation Model, and AI for Science workloads.

DataScale reduces the cost and complexity of AI initiatives by providing a fully integrated system, from silicon to software, that is designed to deliver a unique combination of unmatched performance, unprecedented ease of use, and seamless scalability.

**Built with the SambaNova Reconfigurable Architecture**

DataScale is a next-level data center solution that can be installed and operating in only minutes. The SambaNova complete software stack delivers the only practical solution to running complex AI and deep learning workloads with significant parallelization efforts and enables users to run their own models without any proprietary or long-term lock-in. Users interact with common open source ML frameworks, such as PyTorch and TensorFlow. Low-code/no-code AI dramatically simplify management with no proprietary knowledge required.

**Cardinal SN30**  
  
SambaFlow Software  

**DataScale SN30**  

1

**The World's First Native Dataflow Processor**

SambaNova DataScale is built with the SambaNova Reconfigurable Dataflow Unit™ (RDU), the industry's next-generation processor built from the ground up to provide native Dataflow processing. Features include:

-  **SambaNova Reconfigurable Dataflow Architecture** eliminates the constant data copies and memory management deficiencies inherent to today's core-based architectures, unlocking unmatched efficiency.
-  **100s of MBs of on-chip memory, 100s of TFLOPs of computing power, and direct access to 1 Tb of off-chip memory** enable developing and deploying more sophisticated models with richer context than ever before, faster and easier, and without the extensive parallelization efforts required by GPUs.
-  **Optimized data computation and communications result in high performance of optimal efficiency out-of-the-box across models of all sizes and forms, and for any batch size across training and inference.**
-  **100s of TFLOPs of compute** delivering unmatched acceleration to drastically reduce time to results.

**The Industry's Most Advanced Software**

SambaNova DataScale features SambaFlow, a complete software stack designed to take input from standard machine learning frameworks.

- Fully integrated with popular open source ML frameworks, such as PyTorch.** No code modification is required to run.
- Push-button parallel compilation, optimization and execution** provides high performance out-of-the-box without the need for low-level tuning.
- Automatic data and model parallel mapping** integrates by using the same programming model as on a single device—no special programming required.
- Secure multitenancy and concurrent multi-graph execution** provides seamless scale-up and scale-out flexibility to manage multiple and memory resource utilization with no waste.
- The latest productionized algorithms** estimate memory of tuning and scaling needs to enable you to elevate your focus on what matters, most—the application.

## Best Value!

### Homeowner's Insurance Deductible Reimbursement

- In the event of a homeowners insurance claim at your primary residence, reimburses your deductible up to \$1,000 for a covered loss that exceeds your homeowners insurance deductible.
- Benefit is provided for 60 months (5 years).

### Appliance Home Warranty

- Provides for a service provider to repair or replace a Clothes Dryer, Clothes Washer, Built-In Microwave, Dishwasher, Kitchen Refrigerator, and/or Range/Oven/Cooktop.
- Coverage is subject to a service call deductible of \$95, \$500 limit per item.
- Coverage begins thirty (30) days after registration on the Home Suite Home website and continues for 12 months. At time of registration, Borrower also has the option to select coverage to instead begin in 12 months so as to provide coverage during Year 2.

### Identity Theft Reimbursement & Restoration Consulting Services

- ID Theft Reimbursement coverage provides reimbursement, up to \$1 million of expenses incurred in order to recover from fraud, embezzlement, theft, forgery, data breach, or a stolen identity.
- Restoration Consulting Service provides an assigned ID Recovery Advocate, an ID Recovery Package, and an ID Restoration Consulting Recovery Plan.
- Benefit is provided for 60 months (5 years).

\*Appliance Home Warranty currently unavailable in CA, ME, NY, WA.

## INSTALLATION AND ELECTRICAL REQUIREMENTS

Electrical power specifications	
• US: 208 VAC, 60 Hz, 3-phase wye configuration circuit with separate neutral and ground conductors. Can be installed to ETI#E8 or a dedicated 20-amp circuit or dedicated 30-amp circuit. For 20-amp circuit, requires NEMA L-21-20R five-wire grounding twist lock outlet. For 30-amp circuit, requires NEMA L-14-30R five-wire grounding twist lock outlet.	• Canada: 209 VAC, 60 Hz, NEMA L-21-30 5-wire grounding twist-lock outlet attached to a dedicated 30-amp, 3-phase wye configuration circuit with separate neutral and ground conductors.
• Germany: 230 VAC, 50 Hz, 3-phase wye configuration circuit with separate neutral and ground conductors. Requires a dedicated 30-amp, 3-phase wye configuration circuit with separate neutral and ground conductors.	• Japan: 200 VAC, 50/60 Hz, 4-wire grounding outlet attached to a dedicated 30-amp, 3-phase delta or ground fault protection circuit with separate neutral and ground conductors.
Installation space requirements	The rear panel of STERRAD® 100NX Systems with ALLClear™ Technology should not be placed closer than 2 in (50.8 mm) from the rear wall. The power receptacle should be positioned 12 in to 24 in (30.5 to 61 cm) above the floor. For recessed systems, a clearance of 1 in (25 mm) from the top of the system to the ceiling is required to allow for proper ventilation.
Service space requirements	Service access requires a minimum clearance of 34 in (86.0 mm) above the top and approximately 39 in on all sides of the system (can be less if the system can be moved for servicing).

## OPERATIONAL ENVIRONMENT

Temperature	64.4°F–99°F (18°C–35°C)
Humidity	10%–85% RH (noncondensing)

## NETWORKING AND DATA RECORDING

System performance data and reports	Cycle history, full 1-second data files, and reports available via ASP ACCESS™ Technology
Network connectivity	Communication protocol for Instrument Tracking Systems (ITS) available via ASP ACCESS™ Technology
Data recording	<ul style="list-style-type: none"> <li>Electronic data storage up to 50 cycles</li> <li>Internal printer for manual reprocessing</li> <li>Full electronic cycle data and reports via ASP ACCESS™ Technology</li> </ul>
